Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - <i>who are they?</i>	Describe the customer and their attributes here
I'm trying to	List their outcome or "job" the care about - <i>what are they trying to achieve?</i>	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way - <i>what bothers them most?</i>	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists - <i>what needs to be solved?</i>	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view - <i>how does it impact them emotionally?</i>	Describe the emotions the result from experiencing the problems or barriers

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	an employee (requester) who needs a new laptop for work	request a standard laptop and check the status of my request	the request goes through manual forms and messages , and I have to keep following up for approval	there is no single system to submit, approve, order and track laptop requests	frustrated and uncertain about when I will get my laptop
PS-2	an approver / procureme nt admin handling laptop requests	review, approve and order standard laptops quickly and correctly	requests are scattered, laptop specificati ons keep varying, and order status is hard to monitor	approvals, ordering and tracking are done manually without a central view of pending and completed requests	overloaded and worried that requests may be delayed or missed
