

Ideation Phase

Empathize & Discover

Date	29/09/2026
Team ID	SWTID-2026-2508
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders
Maximum Marks	4 Marks

Empathy Map Canvas:

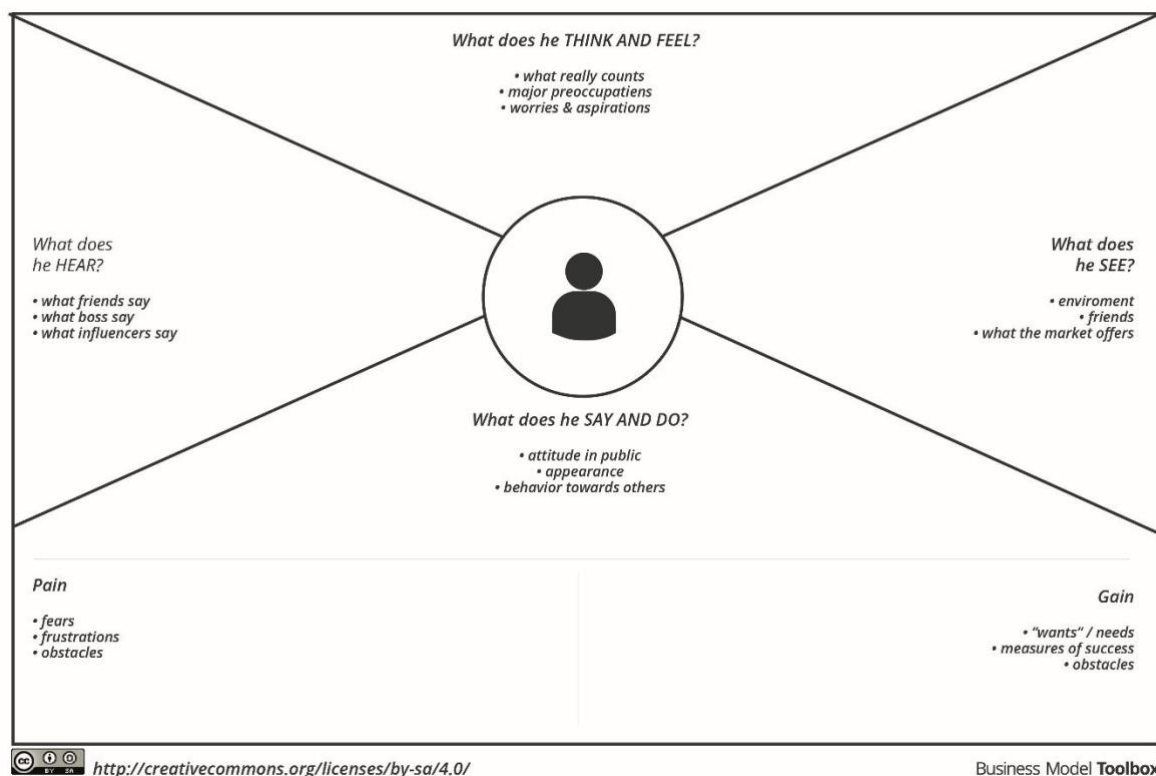

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

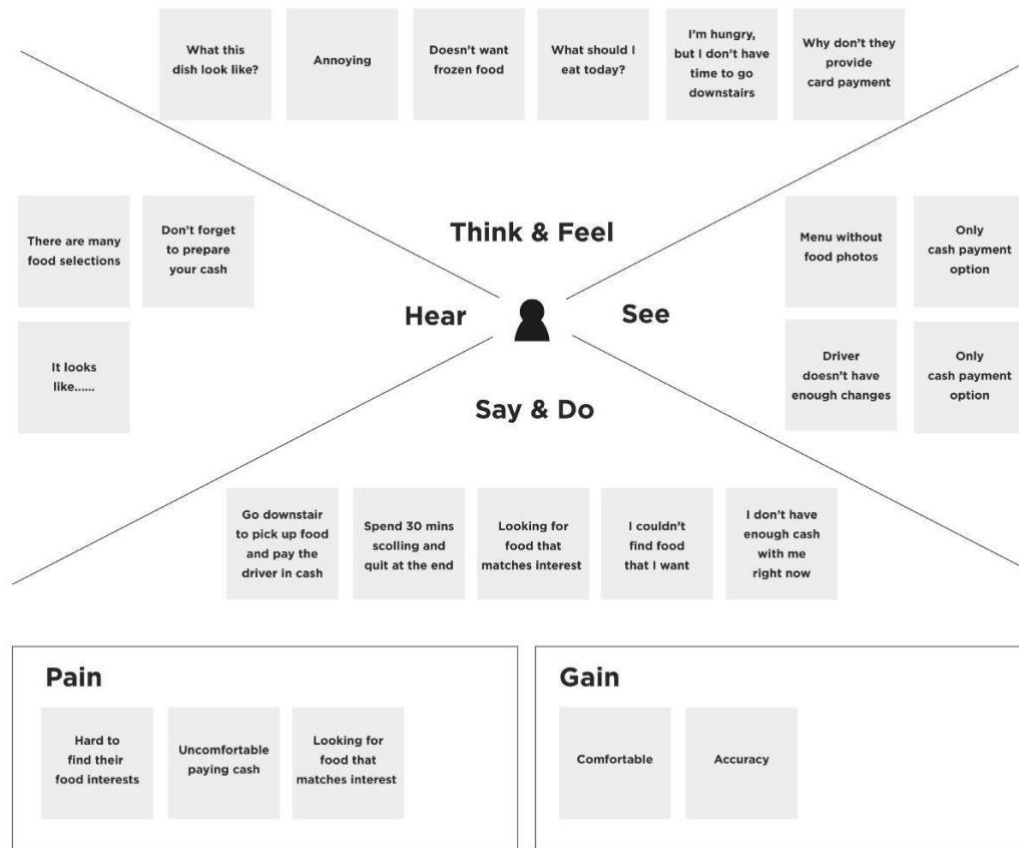

Example:

Empathy Map

Example: Food Ordering & Delivery Application

Empathy Map: Streamlining IT Procurement (User: Employee / Requester)

Think & Feel When will my laptop request be approved? Worried the request may get lost or delayed Annoyed at having to follow up again and again Wants a simple and clear process	Hear "Your request is still pending" "Please send the request form again" Colleagues saying laptop orders take weeks "Check with the admin for the status"
See Requests scattered across emails and forms No place to check the request status Different laptop models for similar needs Colleagues waiting for their laptops too	Say & Do Emails or calls the admin for an update Fills in request details manually Asks "Has my laptop been approved yet?" Waits without knowing the order status
Pain Manual follow-ups for approval No visibility of request status Delay in receiving the laptop Inconsistent laptop choices	Gain Easy online laptop request Real-time request status tracking Faster approval and ordering Standard laptop options and notifications
