

Project Design Phase

Problem – Solution Fit Template

Date	15 February 2025
Team ID	SWTID-2026-2508
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ Understand the existing situation in order to improve it for your target group.

Template:

Define CS, fit into CC	1. CUSTOMER SEGMENT(S) CS - Employees (requesters) who need a laptop - Approvers / admins who review requests - Procurement team who place and track orders - IT / admin teams of small and mid-size organizations	6. CUSTOMER CONSTRAINTS CC - Only approved standard laptop models can be bought - Every purchase needs approval before ordering - Limited budget and procurement staff time - Users are not technical, so the system must be simple - Needs a browser and email access	5. AVAILABLE SOLUTIONS AS - Email / phone / paper requests: no setup cost, but slow and easy to lose - Spreadsheets for tracking: familiar, but manual and no approval flow - Large ERP procurement suites: powerful, but costly and complex	Explore AS, differentiate
	2. JOBS-TO-BE-DONE / PROBLEMS J&P - Submit a laptop request and check its status - Approve or reject requests quickly - Place standard laptop orders and track them Problem: manual requests, approval follow-ups and unclear status take time	9. PROBLEM ROOT CAUSE RC - Requests, approvals and orders are handled manually over email and paper - No standard laptop list, so every request differs - No single place to see request status - Approvers and procurement are chased for updates	7. BEHAVIOUR BE - Employees email or call the admin to request a laptop - They keep asking for status updates - Admins approve by email; procurement orders manually - Records end up in scattered emails and spreadsheets	
Identify strong TR & EM	3. TRIGGERS TR - A new joiner, or an old or faulty laptop needs replacing - Pending requests pile up and slow the admin down - Management wants faster, trackable procurement	10. YOUR SOLUTION SL A web-based laptop procurement system: - Request form with a standard laptop catalog - Admin approval or rejection with history - Approved requests become orders with status tracking - Dashboard (pending, approved, ordered, completed), notifications and basic reports Fits the limits: standard models only, simple screens, less manual work.	8. CHANNELS of BEHAVIOUR CH 8.1 ONLINE Emails to admin / IT, company chat, email status updates, web request portal 8.2 OFFLINE Asking the admin or IT desk in person, phone calls, paper approval forms	Extract online & offline CH of BE
	4. EMOTIONS: BEFORE / AFTER EM - Before: frustrated and unsure, waiting with no updates - After: confident and in control, sees status clearly and saves time
