

Code-Layout, Readability and Reusability

Date	29 September 2026
Team ID	SWTID-2026-2508
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability.

Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	Uniform 4-space indentation in all scripts and flow logic.
2	Proper File Structure	Files and folders are logically organized	Yes	Catalog items, workflows, scripts and notifications grouped separately.
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Names such as laptopModel, requestedBy and approvalStatus.
4	Function / Method Names	Functions are descriptively named	Yes	Verb-based names, e.g. validateLaptopRequest(), createPurchaseOrder().
5	Code Comments	Inline and block comments explain logic	Partial	Key logic commented; a few helper scripts need more detail.
6	Modular Design	Code is split into reusable functions/modules	Yes	Validation, approval and ordering steps are separate modules.
7	No Redundant Code	Duplicate or unused code is removed	Yes	Duplicate checks consolidated; unused test code removed.
8	Error Handling	Exceptions and errors are handled gracefully	Yes	Try/catch blocks with clear user messages for failed requests.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Laptop Request Catalog Form	ServiceNow (Service Catalog)	Standard laptop and accessory requests	High
2	Approval Workflow	Flow Designer	Manager and IT approvals for other hardware orders	High
3	Request Validation Script	JavaScript	Catalog form and order processing	Medium
4	Purchase Order Automation	Flow Designer / Script	Vendor ordering for standard devices	Medium
5	Notification Templates	ServiceNow (Notifications)	Request, approval and delivery updates	High

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	5	Logical structure with consistent indentation.
Readability	4	Clear naming; minor improvements possible in helper scripts.
Reusability	4	Core modules reusable for other standard hardware orders.
Documentation / Comments	4	Main logic documented; add more inline detail.
Overall Score	4.3 / 5	Well-structured, maintainable and reusable codebase.
