

Coding & Solution

Date	29 September 2026
Team ID	SWTID-2026-2508
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	[Paste your GitHub / GitLab or hosted link here]
Programming Language(s)	JavaScript (server and client scripts)
Framework(s) Used	ServiceNow platform (Service Catalog, Flow Designer)
Key Features Implemented	• Service catalog form for requesting standard laptops • Automatic validation of request details • Automated approval routing to the manager and IT team • Automatic purchase order creation for approved requests • Email notifications for request, approval and delivery status
Pending / Incomplete Features	• Integration with the vendor's live inventory and pricing • Reporting dashboard for procurement analytics
Setup / Run Instructions	1. Log in to the ServiceNow developer instance. 2. Import the update set / application from the repository. 3. Activate the catalog item and the approval flow. 4. Submit a test laptop request from the Service Catalog and verify approval, order and notifications.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The solution automates the ordering of standard laptops, reducing manual effort and approval delays. Requests are validated, routed for approval and converted into purchase orders automatically, with status notifications at each stage. Pending items are planned as future enhancements.
