

Customer Journey Map: Streamlining IT Procurement

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders **Team ID:** SWTID-2026-2508 **Date:** 29/09/2026

User: Employee / Requester (with Approver / Admin and Procurement team involved)

SCENARIO Requesting, getting approved, ordering and receiving a standard laptop	Entice How does someone initially become aware of this process?	Enter What do people experience as they begin the process?	Engage In the core moments in the process, what happens?	Exit What do people typically experience as the process finishes?	Extend What happens after the experience is over?
Steps What does the person typically experience?	- Employee needs a new or replacement laptop - Learns that laptop requests are made through the procurement system	- Logs in and opens the laptop request form - Selects a standard laptop from the catalog - Enters details and submits the request	- Request reaches the admin - Admin approves or rejects it - Approved request becomes a standard order and procurement places it	- Laptop is delivered - Order is marked completed - Requester confirms receipt	- Request stays in the history - Admin reviews reports on requests and orders - Requester gives feedback
Interactions People, places and things they use at each step	- People: manager, IT/admin team - Things: company portal, notice or email	Things: login page, request form, standard laptop catalog	- People: admin, procurement team - Things: admin dashboard, approval screen, notifications	- People: procurement / IT team - Things: order status page, delivery notification	Things: request history, reports page, feedback form
Goals & motivations At each step, what is the primary goal? ("Help me...")	Help me find out how to get a laptop quickly	Help me submit my request without confusion or repeating details	- Help me know my request is moving forward (Admin) Help me review requests quickly	Help me receive the right laptop and close my request	- Help me see my past requests (Admin) Help me see how procurement is going
Positive moments What steps are enjoyable, productive or delightful?	One clear system for all laptop requests	- Standard models make choosing simple - Employee details can be filled in automatically	- Status is visible on the dashboard - Approval history is recorded - Notification on approval	Completed status and delivery notification give closure	History and reports make records easy to find
Negative moments What steps are frustrating, confusing or time-consuming?	Unsure who to ask or which laptop to choose	- Too many options may confuse - Having to fill in the same details again	- Delay if the admin does not respond - Rejection without a reason	- Delivery delay with no update - Unclear who to contact if the laptop is wrong	- Reports may lack needed details - No easy way to give feedback
Areas of opportunity How might we make each step better?	Add a clear "Request a laptop" link on the company portal with a short guide	- Recommend a standard model by role - Auto-fill employee details - Show a confirmation after submitting	- Send reminders to approvers for pending requests - Ask for a reason on rejection - Auto-create the order after approval	- Show an expected delivery date - Add a "Confirm receipt" button and a simple issue-report option	- Allow downloadable reports - Ask for a quick rating after delivery - Reuse past requests for future needs
