

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	29/09/2026
Team ID	SWTID-2026-2508
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Login & Access	Login with company email and password Role-based access for Employee, Approver / Admin and Procurement team
FR-2	Laptop Request	Online laptop request form Employee details filled in automatically Selection of a laptop from the standard catalog
FR-3	Approval Workflow	Admin views pending requests Admin approves or rejects a request with a reason Approval history is recorded
FR-4	Standard Laptop Catalog	Predefined standard laptop models and specifications Admin adds or updates catalog models
FR-5	Order Management & Tracking	Approved request is converted into a standard order Procurement team places the order and updates order status Requester tracks status: pending, approved, ordered, completed
FR-6	Notifications, Dashboard & Reports	Email / in-app notification on every status change Admin dashboard of pending, approved, ordered and completed requests Basic reports of requests, approvals and orders

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The web interface is simple and easy to use, so an employee can submit a laptop request in a few steps without training. Request status is shown with clear labels.
NFR-2	Security	Role-based access so only admins can approve requests and only the procurement team can update orders. Passwords are stored in hashed form and request and order data is protected from unauthorised access.
NFR-3	Reliability	Requests, approvals and orders are saved correctly and not lost. Input validation prevents wrong or incomplete entries, and the approval history is always preserved.
NFR-4	Performance	Pages, the dashboard and status updates load within a few seconds under normal use, and request submission is quick.
NFR-5	Availability	The system is available during working hours, with regular data backups so it can be restored quickly after a failure.
NFR-6	Scalability	The system can handle more employees, requests and standard laptop models over time without redesign, and new roles or catalog items can be added easily.
