

PHASE 8 – PROJECT DEMONSTRATION

Project Title

Streamlining IT Procurement: Automating Standard Laptop Orders

1. Introduction

The Project Demonstration Phase is the final stage of the project. In this phase, the completed IT procurement system is demonstrated through a video to explain its purpose, features, working process, and final output.

2. Demonstration Objectives

The main objectives are:

- Explain the project clearly.
- Demonstrate the working application.
- Show the main features and modules.
- Explain the complete workflow.
- Present the final project output.

3. Demo Video Content

The demonstration video should include:

1. Project Name

Start the video by introducing the project:

“Streamlining IT Procurement: Automating Standard Laptop Orders”

2. Project Purpose

Explain why the project was developed and the problems it solves.

3. Project Benefits

Explain how the system helps to:

- Reduce manual work.
- Save processing time.
- Simplify approvals.
- Reduce errors.
- Track laptop requests.

4. Screen Sharing

During the demonstration, the student should share the project application screen and show the actual working process.

5. Voice-over Explanation

The student should explain the project using their own voice while demonstrating the application.

6. Working Process

Demonstrate the complete workflow

Login → Laptop Selection → Request Submission → Manager Approval → IT Review → Procurement → Order Completion

7. Final Output

Show the final working screens and explain the completed result.

4. Demo Video Structure

Step| Demonstration

1| Introduce project name

- 2| Explain project purpose
- 3| Login to the system
- 4| Show laptop options
- 5| Submit laptop request
- 6| Show approval process
- 7| Show procurement process
- 8| Show request tracking
- 9| Display final output
- 10| Give project conclusion

5. Submission Requirements

According to the project instructions:

- Upload the demo video to Google Drive.
- Set sharing permission to Anyone with the link – Viewer.
- Add the Google Drive demo link to the project submission.
- Maintain all project files in the public GitHub repository.
- Ensure all eight project phases are uploaded phase-wise.

6. Final Checklist

- [] Project name explained.
- [] Purpose explained.
- [] Benefits explained.
- [] Screen sharing included.
- [] Student voice-over included.
- [] Working process demonstrated.
- [] Final output shown.
- [] Demo video uploaded to Google Drive.
- [] Google Drive sharing set to Anyone with the link – Viewer.

- [] Public GitHub repository updated.

7. Conclusion

The Project Demonstration Phase presents the completed IT procurement automation system. The demo video clearly shows the project's purpose, features, workflow, and final output, providing a complete overview of the developed system.
